

# Appendix L - NY School Mental Health Resource Center Impact Statement

Since July 2018, we have provided technical assistance and training to help schools deliver mental health instruction as part of the K-12 curriculum through a comprehensive website and quality educational events that meet the individual needs of the entire school community.

**88%** of schools communities in NY have utilized the Resource Center

Every member of a school community has a role in supporting youth mental health - educators, parents and caregivers, and providers. By supporting common understanding and shared language, MHANYS is committed to helping communities support the mental health of students.

## BUILDING CAPACITY TO INCREASE MENTAL HEALTH LITERACY
