OPPORTUNITIES TO SUSTAIN MENTAL HEALTH AND SUBSTANCE USE SERVICES AND PROMOTE HEALTH INTEGRATION

Suzanne Fields, MSW, LICSW
Senior Advisor to the Administrator for Health Care Financing
SAMHSA

Mental Health America
June 2013
Interplay of Federal & State Policy

• Major Federal and state policies do not always ensure that mental health and substance use are addressed.

• Behavioral health is under-represented in quality measures associated with different aspects of the Affordable Care Act.

• While health fields like pediatrics or cardiology are automatically represented in working groups at the federal and state levels on health issues, behavioral health is often seen as optional or extra.

• Even with health reform, serious gaps will remain in funding of behavioral health services.

• Important to differentiate ACA related decisions that are made at the federal level from those that are made at the state level
All-Health and MHSA Spending in 2009

Spending on MHSA Treatment Accounted for 7.4% of All Health Spending

MHSA Spending = $172 Billion
All-Health Spending = $2,330 Trillion

2009: $24B
Adults

- Over 2/3 of adults with SPMI have co-morbid physical health conditions such as diabetes, heart disease and chronic obstructive pulmonary disease.

- Adults aged 18 or older with any mental illness (AMI) or major depressive episode (MDE) in the past year were more likely than to have high blood pressure, asthma, diabetes, heart disease, and stroke.

- Adults with serious mental illness (SMI) in the past year were more likely to have high blood pressure, asthma, and stroke.

- Those with AMI, SMI, or MDE were more likely to use an emergency room and to be hospitalized.

*SAMHSA NSDUH Report, “Physical Health Conditions among Adults with Mental Illnesses,” 4/5/12*

Note: All percentages were adjusted for (a) age group, (b) gender, (c) race/ethnicity, (d) education, (e) marital status, (f) current employment status, and (g) county type/metropolitan status. All associations between mental illnesses and chronic health conditions are statistically significant at the 0.05 level, except for marginally significant associations for SMI and diabetes (significant at the 0.10 level) and SMI and heart disease (significant at the 0.10 level).

Source: 2008 and 2009 SAMHSA National Surveys on Drug Use and Health (NSDUHs).
Adults

Past Year Emergency Room Use and Past Year Hospitalization among Persons Aged 18 or Older with and without Serious Mental Illness in the Past Year: 2008 and 2009

Note: All percentages were adjusted for (a) age group, (b) gender, (c) race/ethnicity, (d) education, (e) marital status, (f) current employment status, and (g) county type/metropolitan status.

Source: 2008 and 2009 SAMHSA National Surveys on Drug Use and Health (NSDUHs).
Children & Youth

- Around 1 in 5 young people have a mental, emotional, or behavioral health disorder, at an estimated annual cost of $247 billion
- About 1 in 4 pediatric primary care office visits involve behavioral and mental health problems
- About 1 in 3 Medicaid-enrolled children who use behavioral health care have serious medical conditions (primarily asthma)
- In contrast to adults with SPMI and chronic physical conditions (COPD, diabetes, etc.) Medicaid expenditures for children with co-morbid conditions are driven primarily by behavioral health
- Integrated care strategies for children differ from those for adults in a number of important ways, including duration, diagnoses, provisions for consent, involvement of families in peer services, increased staffing ratios for care coordination, etc.

**Cohort I** – Awarded in 2009  
**Cohort II & III** – Awarded in 2010  
**Cohort IV** – Awarded in 2011  
**Cohort V** – Awarded in 2012
Health Homes

- **Service Definition:**
  - Comprehensive care management
  - Care coordination and health promotion
  - Comprehensive transitional care (among levels of care)
  - Individual and family support
  - Referral to community and social support services
  - If relevant, use of health information technology to link services as feasible and appropriate
SAMHSA Efforts

- SAMHSA consultation role with states as part of the CMS state plan review and approval process
- Coordination with CMS
- Technical assistance to states
Persons Who Are Uninsured

Figure 3

The Nonelderly Uninsured by Age and Parent Status, 2010

Children, 16%
Parents, 24%
Adults without dependent children, 59%

49.1 M Uninsured

Children includes all individuals ages 0-18. Parents are defined as adults with dependent children ages 0-18 and adults without children do not have dependent children ages 0-18. Both parents and adults without children include adults ages 19-64. Data may not total 100% due to rounding.

Health Coverage in 2014

Coverage Options for Adults without Medicare or Employer-Based Coverage

Income as a percent of the federal poverty level

0 133 400+

Medicaid
Marketplace with Tax Credits
Marketplace or Private Plan

States must choose to expand
States must create or let feds do it (FFM)
Individuals must act

A Continuum of Coverage – Everyone Fits Somewhere!
• Intermediary-focused efforts will be formed in six categories:
Intermediary Efforts

- Supporting coalition groups in their commitment to promoting access to insurance for their constituents
- Inviting coalition groups to shape enrollment support policy, planning, training and materials development
- Providing leadership for other organizations
Enrollment Resources

- Healthcare.gov

- HHS Partners Resources

- SAMHSA Enrollment Webpage

- State Refor(u)m Exchange Decisions
  - [http://www.statereforum.org/node/10222](http://www.statereforum.org/node/10222)

- Enroll America Best Practices
  - [http://www.enrollamerica.org/best-practices-institute](http://www.enrollamerica.org/best-practices-institute)
Wellstone/Domenici Mental Health Parity and Addiction Equity Act of 2008

- Requires that IF a plan includes MH/SUD, then it must do so with:
  - No greater financial burden (cost sharing, deductibles) than med/surg
  - No annual or lifetime limits unless also apply to med/surg benefits
  - Benefits not more limited than med/surg (number visits, frequency of treatment, etc) – Non-quantitative treatment limits
  - Out of network if med/surg out of network
  - Transparency in medical necessity & denials of care

- Exemptions from law
  - Employer with less than 50 employees
  - If costs go up (>2% first year, >1% after that)
Federal Activities

- Tri-agency effort: HHS, Labor and Treasury in development of guidance and the move toward the final set of regulations
- Data and information to inform reports to Congress and the assessment of the impact of parity
- Center for Medicare & Medicaid (CMS) working closely with a number of states on interpretation of MHPAEA regulations and enforcement
- Dept of Labor (DOL) is working on updating the support and training materials for its inspectors that are involved in parity enforcement
- Webinar sessions and information – In collaboration with CMS, next series beginning in May
- Parity Communication Strategy- materials available to disseminate to staff, youth and families, community organizations
